## 1.0 Introduction

In February 2020, AECOM, on behalf of the DuPont Specialty Products USA, LLC (DuPont), prepared and submitted the *Parking Lot 1 Excavation Work Plan for Areas SB-01 and SB-13* (Excavation Work Plan) located at the DuPont Experimental Station in Wilmington Delaware (see Figure 1). The work plan presented a summary of historical site information, remedial investigation findings, and the proposed field activities to be performed to remediate the areas previously delineated at Soil Boring 01 (SB-01) and Soil Boring 13 (SB-13).

The associated fieldwork was completed in May 2020. AECOM has prepared this *Parking Lot 1 Post-Excavation Summary Report for Areas SB-01 and SB-13* (Summary Report) to document the work performed in adherence to the Excavation Work Plan.

This Summary Report presents the following information in the identified sections:

- Section 2 describes the pertinent background information associated with this project.
- Section 3 describes the field activities performed to complete the remedial action per the Excavation Work Plan.
- Section 4 summarizes the work completed.

## 2.0 Background

The 150-acre [0.61 square kilometers (km<sup>2</sup>)] campus-style Experimental Station, located in Wilmington, Delaware, serves as the primary research and development facility for DuPont (see Figure 1).

Parking Lot 1 is located at the southwestern end of the DuPont Experimental Station Property (see Figures 1, 2, and 3). Prior to the 1950s, the area of what is now Parking Lot 1 was the original DuPont Country Club and golf course. In the 1950s, the golf course was converted into a parking area (asphalt top). However, the Club House remained and was used as a cafeteria, and the associated “CaddyShack” was converted to a credit union. These buildings were in use into the 1980s when they were demolished and removed. In addition, there was another building (Greenhouse Building 365) within Parking Lot 1, which was constructed early in the history of the Experimental Station and was used primarily for offices and shops until the 1990s when that building was demolished.

In March 2019, in preparation for the Parking Lot 1 reconfiguration project, DuPont conducted pre-excavation soil sampling to assist in determining proper soil disposal options for excess soil that might not be re-used as part of the Lot 1 reconfiguration. As part of this March 2019 event, composite soil samples were collected at each of the 25 boring locations. Of these 25 boring locations, the soils associated with five locations were identified as being of interest by Delaware Natural Resources and Environmental Control (DNREC).

In September 2019, delineation soil samples were collected from the five boring areas of interest. On December 16, 2019, DuPont and AECOM presented the delineation soil sample analytical results and associated recommendations to DNREC’s Wendy March. After review of the analytical data and presentation, DNREC in a January 8, 2020 email approved the DuPont recommendation that SB-13 (constituent of interest = benzo(a)pyrene) be excavated and recommended that remediation via soil blending be considered for SB-01 (constituent of interest = arsenic).

In January 2020, DuPont and AECOM submitted the *Parking Lot 1 Summary Remediation Plan for Areas SB-01 and SB-13* (Remediation Plan) to DNREC for approval. This Remediation Plan further detailed the proposed remedial approach for the SB-01 and SB-13 areas. This approach included excavation and off-site disposal of soils from SB-13 and blending of soils from SB-01. DNREC provided comments to the plan to DuPont and AECOM in February 2020, which included a requirement for a 30-day public notice period prior to implementing soil blending at SB-01. DuPont subsequently decided to propose excavation and off-site disposal of soil from SB-01. This alternate approach was provided to DNREC for review in February 2020. Following correspondence with DNREC, AECOM prepared the Excavation Work Plan that, along with the other provided companion documents, included further details on how the proposed Remediation Plan would be implemented on-site.

### 3.0 Remedial Action Completed

DuPont and AECOM proposed the excavation and disposal of soils and removed cover materials from the SB-01 and SB-13 areas as outlined in the Excavation Work Plan. In February 2020, AECOM prepared a Request for Quote (RFQ) package to solicit quotes from remedial contractors to complete the proposed scope of work. AECOM received and reviewed bids from two remedial contractors. In early March 2020, following review of the bids, Eastern States Construction (ESC) was selected as the contractor. Work was scheduled to begin shortly after award of the contract in March 2020; however, due to restrictions related to the COVID-19 pandemic, work was put on hold until May 2020. All work was then completed as of May 18, 2020.

AECOM and ESC performed the remediation activities in accordance with the Excavation Work Plan, appendices, and companion documents such as the Health and Safety Plan (HASP) and Waste Management Plan (WMP). AECOM-provided DuPont Site Representatives (DSRs) oversaw the field effort. Work was conducted in accordance with the contract documents provided in the RFQ, which included DuPont and Experimental Station standard operating procedures, site conditions, and permits. Additional information regarding these requirements is included in the Excavation Work Plan for reference.

The extent of the remedial work completed is shown on Figures 2 and 3. Daily reports including site photographs, truck-load logs, and progress figures are included in Appendix A.

All excavated materials were direct loaded onto triaxle trucks and taken for off-site disposal at Waste Management Fairless Hills in Morrisville, Pennsylvania. Waste Manifests as well as the weighed truck tonnage tables are included in Appendix B.

### 3.1 Health and Safety, Utility Clearance, Permitting, and Mobilization

AECOM and ESC both prepared and abided by HASPs specific to this scope of work. The AECOM DSRs provided dust monitoring as well as health and safety oversight for both AECOM and ESC personnel throughout the duration of the work. In addition to the typical health and safety procedures related to the remedial work, the team also followed additional procedures and precautions related to the COVID-19 pandemic, which included the following:

- Maintaining social distancing
- Wearing face coverings
- Limiting personnel on-site
- Minimizing the need and/or using additional sanitizing measures for sharing of equipment, vehicles, pens, etc.

In accordance with the contract documents and the site excavation permitting process, ESC mobilized a subcontractor to perform utility clearance of the proposed work areas on Monday May 4, 2020. ESC then completed a site excavation permit incorporating the results of the utility clearance.

ESC and AECOM formally mobilized their respective crews for the remedial excavation on Wednesday May 13, 2020. The integrated site team discussed the scope of work, work area limitations, and coordination of trucking for transportation and disposal of the excavated material.

ESC installed erosion and sedimentation (E&S) controls and barricades around each work area.

### 3.2 Area SB-01

ESC began with work in the SB-01 area on May 13, 2020. For the SB-01 area, excavation and off-site disposal of soils and cover materials were determined as the remedial method to address the arsenic detections. Remediation details are as follows:

- ESC excavated a truncated circular area that has a radius of 20 feet from the SB-01 center boring (SB-01C). The area consists primarily of a 20-foot radius semi-circle running clockwise from north to south. The area then extends out 4 feet to the west from SB-01C, halfway to SB-01-5W. This footprint was excavated to a minimum depth of 3 feet below ground surface (bgs).
- The SB-01 remediation area is centered in a vegetated island surrounded by asphalt parking lot and curbing. The asphalt parking lot and curbing were saw cut along the proposed footprint of the excavation. Asphalt, curbing, and parking lot related subbase, within the proposed footprint, were excavated and disposed of per the WMP.
- Soil within the proposed footprint was excavated to a minimum depth of 3 feet bgs. Excavated soil and cover materials were direct loaded onto trucks and taken off-site for disposal per the WMP. It is estimated that approximately 165 tons, or 7.5 truckloads, were excavated from SB-01.
- The excavation was promptly backfilled by DuPont on the same day.

### 3.3 Area SB-13

Following completion of the SB-01 excavation and load-out, ESC moved to the SB-13 area and began excavation work on May 13, 2020. Excavation work at SB-13 was completed on Monday, May 18, 2020. Remediation details are as follows:

- Shallow soils:
  - ESC excavated shallow soils down to a minimum of 5 feet bgs and out to a radius of 35 feet from the center confirmation boring (SB-13C). The SB-13 area consists of a primarily grass area. The northern portion of the circle extends into the parking lot and includes a section of concrete sidewalk. The eastern side of the SB-13 area extends through a temporary construction road. The area slopes to the southeast at a slope of between 15% to 20%. The 5-foot depth was based on the underlying 5- to 7-foot sample interval, which contained soils that did not exceed criteria.
  - During excavation on the southern edge of the 35-foot radius, ESC encountered the 6-inch polyvinyl chloride (PVC) storm pipe identified during the utility clearance. In order to safely excavate under and behind this pipe, ESC opted to cut and temporarily remove a section of the pipe. Following completion of the excavation in this area, ESC reinstalled the pipe using couplings and backfilled beneath the pipe with clean stone fill.

- Deep soils:
  - ESC excavated a 10-foot by 10-foot square footprint (out to a distance of 5 feet on each side of boring SB-13-5S) down to bedrock. Weathered bedrock was encountered at approximately 9.5 feet bgs.
  - An excavation width of 5 feet in all directions around SB-13-5S was selected because the adjacent 5- to 7-foot soil samples did not exceed Hazardous Substance Cleanup Act (HSCA) criteria.
- Excavated soil and cover materials were direct loaded onto trucks and taken off-site for disposal per the WMP. It is estimated that approximately 1,193 tons, or 52.5 truckloads, were excavated from SB-13.
- The excavation was left open to be backfilled by DuPont during upcoming work in the area.

### **3.4 Equipment Decontamination and Demobilization**

All excavation equipment was dry decontaminated between remediation areas and prior to leaving the facility. After completion of work in each area, ESC cleaned the work zone and surrounding support zones to the satisfaction of AECOM and DuPont.

ESC demobilized on Monday, May 18, 2020. ESC left the barricades in place surrounding SB-13 in accordance with direction from KBR and DuPont. That portion of the excavation was to be backfilled by DuPont under a separate contract.

## 4.0 Summary of Work Completed

Remedial excavation was completed at SB-01 on May 13, 2020. The excavation at SB 13 was completed over the course of four days: May 13-15 and 18, 2020.

Excavations in both areas were completed to the full excavation limits. Bedrock was encountered in the deep portion of the SB-13 excavation at approximately 9.5 feet bgs. In total, 1,358 tons of material were removed from the areas and taken off-site, via 60 triaxle truckloads, for disposal at Waste Management Fairless Hills in Morrisville, Pennsylvania.

No visible dust, dust monitor is N.R.</p> <p>0806 – Load #36: Truck 212 (Horwith Trucking) – Manifest #9260282</p> <p>0811 – Load #37: Truck 229 (Horwith Trucking) – Manifest #9260283</p> <p>0815 – Load #38: Truck 219 (Horwith Trucking) – Manifest #9260284</p> <p>0830 – Load #39: Truck 227 (Horwith Trucking) – Manifest #9260285</p> <p>0850 – Load #40: Truck 211 (Horwith Trucking) – Manifest #9260286. 10 total truck today. First turn is completed.</p> <p>0900 – Excavator hit bedrock at approximately 9.5' bgs in deeper (10' L x 10' W x ~13' D) excavation.</p> <p>1030 – Trucks arriving for second turn.</p> <p style="text-align: center;">(Continued on next page...)</p>		

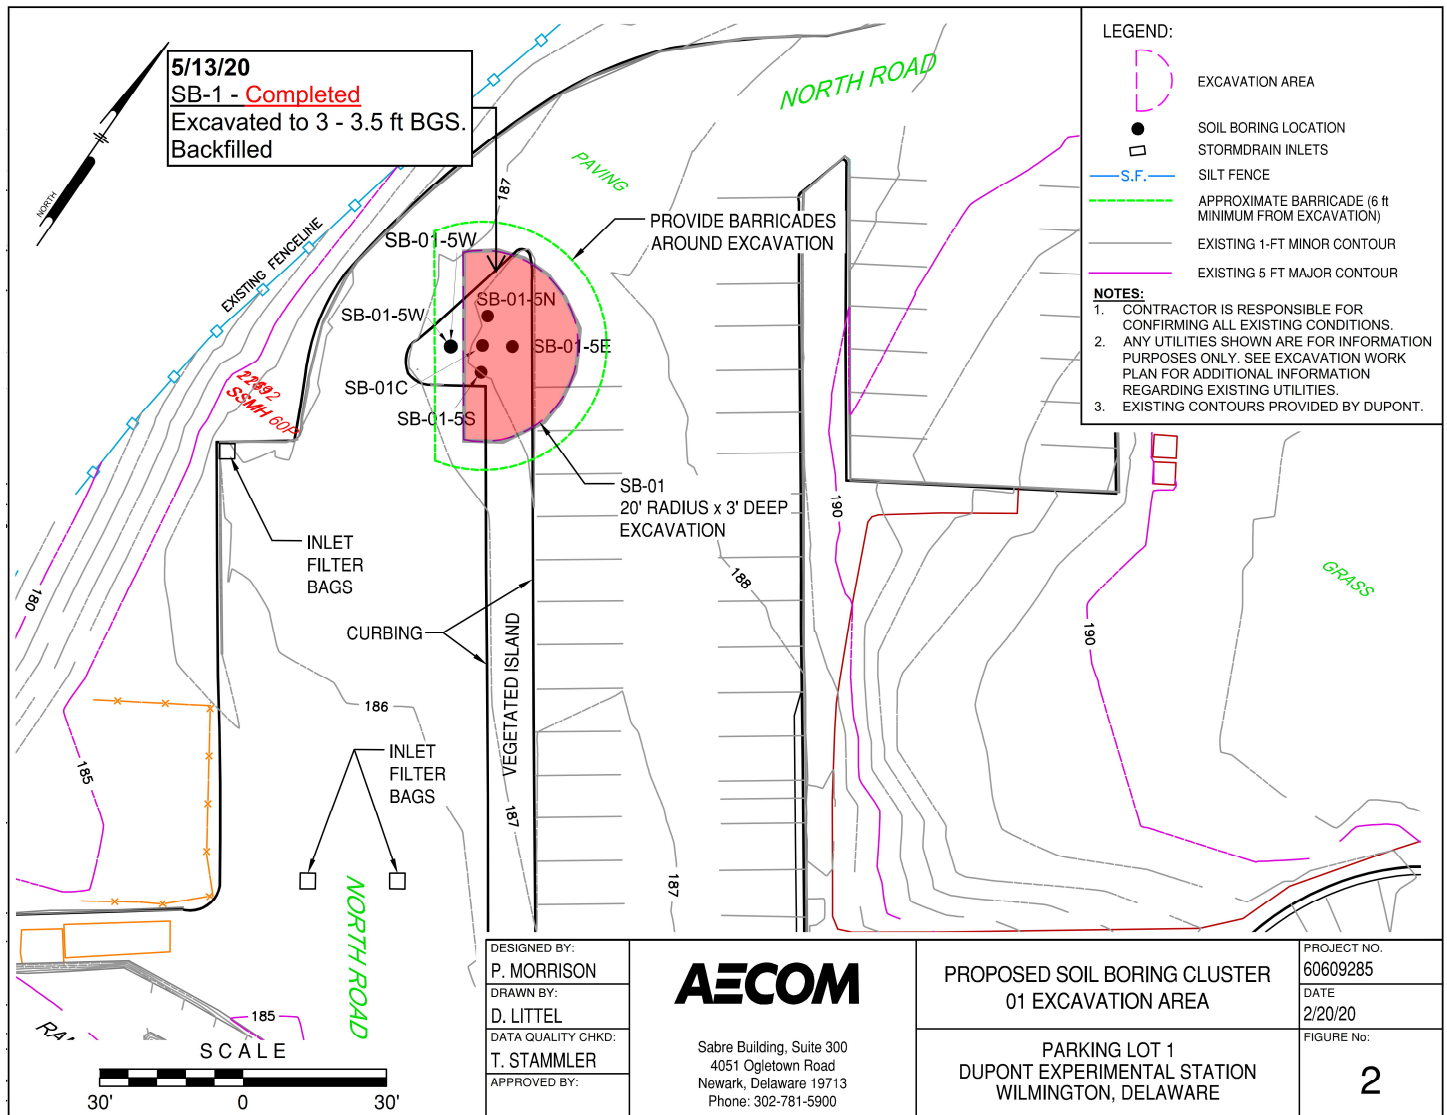

DAILY CONSTRUCTION REPORT	
PROJECT AND SITE INFORMATION	
PROJECT: Experimental Station Parking Lot 1	DATE: 5/15/20
DESCRIPTION: Lot 1 SB-1 & SB-13 Excavation	PROJECT NO.: 60630940
<p align="center"><b>(Continued from previous page)</b></p> <p>1040 – Load #41: Truck 225 (Horwith Trucking) – Manifest #9260287</p> <p>1045 – Load #42: Truck 200 (Horwith Trucking) – Manifest #9260288</p> <p>1055 – Load #43: Truck 220 (Horwith Trucking) – Manifest #9260289</p> <p>1100 – Load #44: Truck 204 (Horwith Trucking) – Manifest #9260290</p> <p>1110 – Load #45: Truck 230 (Horwith Trucking) – Manifest #9260291.</p> <p>1115 – Load #46: Truck 229 (Horwith Trucking) – Manifest #9260292</p> <p>1120 – Load #47: Truck 212 (Horwith Trucking) – Manifest #9260293</p> <p>1125 – Load #48: Truck 219 (Horwith Trucking) – Manifest #9260294. No visible dust, dust monitor is N.R.</p> <p>1135 – Load #49: Truck 227 (Horwith Trucking) – Manifest #9260295</p> <p>1145 – Load #50: Truck 211 (Horwith Trucking) – Manifest #9260296</p> <p>1200 – ESC takes break for lunch.</p> <p>1225 – Crew back onsite. ESC cleaning up the work area. Team calculated that six (6) more trucks, making two (2) turns, will be needed for Monday 5/18 to complete SB-13 excavation and loadout. Will likely call off the second turn for one (1) or two (2) trucks. Jon Czerwinski (ESC) onsite. Jon agreed, as did ESC operator, that 12 loads would be enough to finish the job Monday.</p> <p>1430 – Site is secured and cleaned up in preparation for weekend storms. All tasks listed above have been completed. All crew offsite.</p> <p align="center"><b>(End of field notes. See following pages for progress tracking and site photos.)</b></p>

**DATE:** 05/15/20

**PROGRESS TRACKING – SB- 13**

## DAILY CONSTRUCTION REPORT

**PROJECT:** Experimental Station – Lot 1 SB-1 & SB-13

**DATE:** 05/15/20

## SITE PHOTOGRAPHS

**Title:** SB-13

**Date:** 05/15/20

**Direction:** Southwest

**Description:** SB-13 storm pipe re-installed and clean stone backfill support completed on 5/14/20.

**Title:** SB-13

**Date:** 05/15/20

**Direction:** Southwest

**Description:** SB-13 deeper excavation (10' L x 10' W) completed to bedrock at ~9.5' bgs. Confirmation method: due to existing ground surface slope, long tape held from ground surface on both sides of excavation and grade pole held to full depth. Measurement taken at intersection point.

**DAILY CONSTRUCTION REPORT**
**PROJECT:** Experimental Station – Lot 1 SB-1 & SB-13

**DATE:** 05/15/20

**SITE PHOTOGRAPHS**
**Title:** SB-13

**Date:** 05/15/20

**Direction:** Southwest

**Description:** SB-13 deeper excavation confirmation photo (see above for more information). Due to distance of photo, so as not to enter excavation, reading of grade pole not legible in photo, but was confirmed visually by AECOM.

**Title:** SB-13

**Date:** 05/15/20

**Direction:** Northeast

**Description:** SB-13 Confirmation measurement. ~5'-3" depth on northern edge.

DAILY CONSTRUCTION REPORT		
PROJECT AND SITE INFORMATION		
PROJECT: Experimental Station Parking Lot 1		DATE: 5/18/20
DESCRIPTION: Lot 1 SB-1 & SB-13 Excavation		PROJECT NO.: 60630940
CLIENT: DuPont		LOCATION: Experimental Station, Wilmington, DE
CONTRACTOR(S): Eastern States Construction (ESC)		
WEATHER: Cloudy Low : 54° High : 69°		
ONSITE PERSONNEL		
COMPANY NAME	# OF PERSONNEL	WORK PURPOSE
ESC	3	Excavate impacted soils and materials from SB-13 in Parking Lot 1 and direct load to trucks for offsite disposal.
AECOM	1 – Gregg Donahue	Provide construction oversight, Health and Safety, and coordination of waste disposal.
VISITOR'S NAME:		
EQUIPMENT LIST		
DESCRIPTION (QTY)	MODEL NO.	COMMENTS
1 Excavator	CAT 336F	
1 Demo Saw		
1 Concrete saw w/ water tank		
<p>0700 – Gregg Donahue (GD) onsite for AECOM. Meet with site crew. Three (3) crew members from ESC onsite (operator, spotter, &amp; laborer). Tailgate, Health and Safety (H&amp;S) and JSA review. SOW is to complete excavation of remaining portion (northwest end) of SB-13.</p> <p>0725 – Load #51: Truck 225 (Horwith Trucking) – Manifest #9260297</p> <p>0740 – Load #52: Truck 200 (Horwith Trucking) – Manifest #9260298</p> <p>0750 – Load #53: Truck 204 (Horwith Trucking) – Manifest #9260300. Note: Manifest #9260299 was discarded during signing due to error.</p> <p>0800 – Load #54: Truck 230 (Horwith Trucking) – Manifest #9260301</p> <p>0810 – Load #55: Truck 229 (Horwith Trucking) – Manifest #9260302.</p> <p>0820 – Load #56: Truck 227 (Horwith Trucking) – Manifest #9260303. Last truck of first round for the day. AECOM and ESC estimated that only four (4) trucks will need to return for a second round to complete loading of SB-13. GD called Horwith trucking dispatch to coordinate the four (4) trucks for second turn.</p> <p>1030 – First truck back for second turn.</p> <p>1040 – Load #57: Truck 225 (Horwith Trucking) – Manifest #9260304</p> <p>1050 – Load #58: Truck 200 (Horwith Trucking) – Manifest #9260305</p> <p>1100 – Load #59: Truck 204 (Horwith Trucking) – Manifest #9260307. Note: Manifest #9260306 was discarded during signing due to error.</p> <p>1130 – Load #60: Truck 230 (Horwith Trucking) – Manifest #9260308. SB-13 excavation is complete.</p> <p align="center"><b>(Continued on next page...)</b></p>
